

**Instructions:** Complete this form for each learning objective in each video. Most videos will have 2-3 learning objectives.

---

State the learning objective.

---

Describe what you have understood about this learning objective based on watching the video. In some instances, the learning objective may be to simply state formulas. In other cases, it will require you to provide a description (potentially including diagrams) of a concept or an explanation of how certain mathematical concepts fit together. You may also want to use this space to copy a worked example or two on the topic.

---

Use this space to write any questions you have about this topic. You will want to raise these questions with your instructor.

---
